Supplementary Table 1. Quantile regression model parameters for age-related changes in pediatric serum magnesium concentrations at the 2.5th, 50th, and 97.5th percentiles

Percentile	Slope (β)	Standard error	p-value	Pseudo-R^2
2.5th	-0.0075	0.0017	0.001	0.071
50th	-0.0073	0.0008	<0.001	0.070
97.5th	-0.0100	0.0040	0.017	0.070
